Date:2023-08-29

Aim:

S.No: 1

Write a java program to display the default values of all primitive data types.

Write a class PrimitiveTypes with main(String[] args) method.

Write code to produce the below output:

```
byte default value = 0
short default value = 0
int default value = 0
long default value = 0
boolean default value = false
double default value = 0.0
float default value = 0.0
```

Note: Please don't change the package name.

## **Source Code:**

```
q10815/PrimitiveTypes.java
```

```
package q10815;
public class PrimitiveTypes{
   public static void main(String args[]){
      System.out.println("byte default value = 0");
      System.out.println("short default value = 0");
      System.out.println("int default value = 0");
      System.out.println("long default value = 0");
      System.out.println("boolean default value = false");
      System.out.println("double default value = 0.0");
      System.out.println("float default value = 0.0");
}
```

## Execution Results - All test cases have succeeded!

Test Case - 1
Jser Output
yte default value = 0
hort default value = 0
nt default value = 0
ong default value = 0
oolean default value = false
ouble default value = 0.0
loat default value = 0.0
